## SUMMARY

---

Results-driven IT graduate with hands-on experience building database-driven and web-based applications using HTML, CSS, JavaScript, PHP, SQL, and MS Access. Adept at developing functional systems from scratch, with a strong foundation in both front-end and back-end development. Eager to contribute to a software engineering team and grow as a professional developer.

## SKILLS

---

**Languages & Technologies:** HTML, CSS, JavaScript, PHP, SQL, MS Access, MySQL

**Tools & Platforms:** Microsoft Office Suite, Google Workspace

**Core Competencies:** Web Development, Database Design, Computer Troubleshooting & Maintenance, Problem Solving, Analytical Thinking

**Soft Skills:** Team Collaboration, Time Management, Strong Communication, Fast Learner

## ACADEMIC PROJECTS

---

### Inventory Management System

- Designed and developed a database-driven inventory system using MS Access and SQL for tracking stock levels, suppliers, and transactions.
- Implemented CRUD operations and report generation features to support business decision-making.

### Barangay Information Website

- Built a responsive website using HTML, CSS, PHP, and MySQL for barangay record management, resident profiling, and announcements.
- Designed a user-friendly interface for community information access and administrative updates.

### Simple Shopping Interface

- Created an interactive e-commerce prototype using JavaScript and PHP with product listings, cart functionality, and order summary.
- Focused on clean UI design and seamless user experience for product browsing and checkout flow.

## INTERNSHIP EXPERIENCE

---

### IT Administrative / Data Processing Intern — Pru Life UK (OJT)

- Developed and maintained organized digital record systems, improving data retrieval efficiency for recruitment operations.
- Automated applicant tracking workflows by encoding and categorizing application data across multiple online platforms.
- Collaborated with administrative staff to streamline documentation processes, reducing manual handling of office records.
- Supported data processing operations by maintaining accurate and up-to-date digital files for applicants.

## EDUCATION

---

### Bachelor of Science in Information Technology

Aug 2022 – Jun 2026

*Arellano University, Plaridel Campus*

- Acquiring competencies in installing, operating, developing, and maintaining computer applications.
- Building a solid foundation in both software and hardware systems.
- Completed academic projects in web development and database systems, applying core programming and system design concepts.
- Engaged in coursework covering networking, system analysis, and application development.
